## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-7 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art of record taken alone or in combination fails to teach or suggest a lamp comprising at least one lead rod and a plurality of filaments, wherein the plurality of filaments is arranged around the lead rod so that each lead rod has two filaments located essentially diametrically opposite sides thereof and wherein groups of three filaments are arranged so that each of the filaments is located at a point of triangle which lies on a plane which is normal to and intersective with the lead rod.

The prior art of record teaches a lamp comprising at least one lead rod and plurality of filaments arranged around the lead rod; however prior art of record taken alone or in combination does not teach or suggest the filaments are located essentially diametrically opposite sides of the lead rod and wherein groups of three filaments are arranged so that each of the filaments is located at a point of triangle which lies on a plane which is normal to and intersective with the lead rod in order to cast a uniform luminous intensity distribution and reducing the shadow onto the envelop of the lamp.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
